Recommendations for 11-month M.S. Program in Construction Management
Academic Year 2014-15

The listings below highlight courses that the Construction Management Faculty deem appropriate for students interested in completing their M.S. degree in eleven months (including no thesis) versus the standard one-and-a-half to two year M.S. degree (with or without thesis). The courses shown below will usually be offered in the semesters shown (changes may occur in some years). The degree may also be completed in nine months if five courses are taken in one semester (such a course load would be demanding). As with all degree program decisions, please coordinate with program advisor for confirmation of your course selection and degree program.

**Fall** (take four)
- CEE 421 (Construction Planning)
- CEE 525 (Construction Case Studies)
- CEE 498CEM (Construction Equipment and Methods)
- CEE 598COD or CEE 526 (Construction Decision Making and Optimization)
- Elective** at 400 or 500-levels

**Spring** (take four)
- CEE 420 (Construction Productivity)
- CEE 422 (Construction Cost Analysis)
- CEE 598SCM (Sustainable Construction Methods)
- CEE 598VSC (Visual Sensing for Civil Infrastructure Engineering & Management)
- Elective** at 400 or 500-levels

**Summer** (take one)
- CEE 422 (Construction Cost Analysis)

- Core courses that are highly recommended are shown in italics.
- Other courses may substitute for non-core courses, as available. All courses shown above are 4 credits each. A total of 36 credits are required for the M.S. degree with no thesis. A minimum of three 5xx courses (12 credits) must be taken in total, of which a minimum of two of the 5xx courses (8 credit hours) must be construction courses.

For questions, please contact:
